

YOU ARE INVITED TO AN EXCLUSIVE ONLINE EVENT

iCAN Speaker Series: *Latest Perspectives on Lipids in Neonatal Parenteral Nutrition*

Thursday, 14 October 2021 | 16:00–17:00 CET | 17:00–18:00 EET

Please Register Today: <https://icanlive.baxter.com/NEOLIPID>

iCAN Speaker Series provides participants an in-depth understanding of key challenges and application strategies within nutritional therapy.

The *International Conference for Advancing Nutrition (iCAN) Speaker Series* is a global education program designed to deliver the most up-to-date information on a variety of relevant topics within clinical nutrition. The program was developed by renowned key opinion leaders and is offered at no cost to healthcare professionals. Attendees will leave the program with a greater scientific and clinical understanding of parenteral nutrition applications along with useful nutritional strategies to help improve their patients' well-being.

OBJECTIVES

- Review current guidelines and recommendations on use of intravenous lipid emulsions in the neonatal population including initiating, dosing, and monitoring
- Understand the latest evidence and controversies surrounding long-chain polyunsaturated fatty acids (LC-PUFAs), specifically DHA, ARA, and EPA
- Understand the latest research on the impact of intravenous lipid emulsion composition on neonatal morbidities and outcomes
